

AIA Minnesota

A Society of The American Institute of Architects

Overview of Low Slope Roofing Systems

This half-day seminar is a Firestone Building Products RoofTops Presentation

Thursday, June 24, 2010

8 to 12:00 noon Program

12 to 1:00 p.m. Lunch provided by Firestone Building Products

Dorsey Ewald Conference Center

3.0 HSW Hours of Continuing Education

This program will provide an unbiased overview of all available commercial roofing options and the critical decisions needed to arrive at an informed roofing design solution. The presentation will cover a wide spectrum of important roofing issues including metal roofing options, ES-1 roof edge wind uplift standard, insulation and reflectivity, and environmental impacts. Additionally, the program will address current industry trends and regional concerns in commercial roofing. The delivery of this program draws upon the experience of building materials professionals and the resources of a major roofing products manufacturer. Attend this program and receive a comprehensive overview on the latest roofing solutions available.

Program objectives

Attendees will be able to:

- 1) describe the commonly employed commercial roofing system solutions.
- 2) explain commercial roofing system composition, both components and chemistry.
- 3) evaluate the conditions and concerns in selecting a commercial roofing solution.
- 4) explain the potential environmental impact of commercial roofing system decisions.

Who should attend

Architects and specifiers who play critical roles when selecting the proper roof for a building will find this program to be invaluable.

Location

Dorsey Ewald Conference Center, 1000 Westgate Drive, St. Paul
Located in the UEL Building. Enter the doors under the blue awning.

10:30 Insulation and Reflectivity
11:30 Q&A
12:00 Lunch, provided by Firestone Building Products

Instructors

Richard J. Ruppert is a Registered Architect with twenty years professional practice experience who is knowledgeable in all facets of project design and construction. His body of work includes the widest possible variety of project types including ten years in Chicago centered on high rise design primarily with Skidmore, Owings and Merrill and multiple projects in historic preservation, conservation and adaptive re-use. The following decade saw Mr. Ruppert in charge of a number of educational and civic projects in Indianapolis and the primary architect for numerous school districts. Most recently was his participation on the soon to be christened Palladium Performing Arts Center in central Indiana. Mr. Ruppert has now brought his experience to focus on the topic of commercial roofing design and deployment with Firestone Building Products.
